FOOD SYSTEMS

Mobile Menu – Attractive

Why are Menu Mobil Classic and Universal the ideal meal transport systems for warm meals?

Whether outside the house or inside - Classic and Universal are the dependable compact trays for transporting completed meals with cold and warm components.

Why are Menu Mobil Classic and Universal . . . appetizing?

Because serving on china dishware is still the unsurpassed way to present meals.

. . . compact?

Because hot and cold menu components can be served simultaneously yet are perfectly insulated from each other.

. . . economic?

Because the strong-walled compact trays have no welded seams and thus with appropriate care have an almost unlimited life.

. . . ergonomic?

Because the thought-through design permits appropriate meal apportioning and the high plate edges allow handicapped and one-hand eaters to eat without help.

. . . safe?

Because the spill-safe inner lid prevents meal components from spilling or running together and a unique slide lock guarantees absolute safety against sliding or slipping - even on the most difficult transport routes.

. . . ecological?

Because reusable parts systems make a significant contribution to avoiding waste as well as energy used optimally, thanks to environmentally friendly insulating foam.

. . . in look and taste

When is Menu Mobil Universal the best solution for you?

With Menu Mobil Universal in addition to soup, main course, dessert and salad, you can even serve fruit and bread. The extended tray also holds cutlery. An attractive transparent cover permits an overview of the actual contents anytime. Especially suitable for long, steep and uneven transport routes.

Menu Mobil Classic and Universal can be easily transported

For Classic and Universal, upper and lower parts are of course stackable and compatible - also in combination with Hot-box and Inducook. Custom made cart for storing and transporting is available for time and space saving handling. Also in transporting the ready meal units we offer mature solutions. Thought through - economical - good value.

**Make high demands on your meal distribution.
Menu Mobil supports you with mature system concepts.**

Inductline

With the induction cart, the trays are easily transported and the foods electronically regenerated precisely to the minute, that is, brought to serving temperature.

Indock is the complete separation of food trolleys and heating technology. The benefits: economy, easy cleaning and weight reduction.

**Caldomet
Caldoset
Caldotray**

The multi-functional warming system dishware. Easily stackable, limitless lifetime. Whether as compact tray system, synthetic cover system or stainless steel cover system - for every use the right solution.

Airline

With Airline Carts, trays are conveniently transported and meals precision regenerated (to-the-minute) electronically with hot air, that is, warmed to serving temperature.

ECO Classic

The tried-and-tested compact tray for transporting pre-portioned menus with chilled and warm meal components, with the extraordinary cost/benefit ratio – especially for „Meals on Wheels“. Breakproof, lightweight, best insulation.

Hotbox

The Classic and Universal systems - but actively heatable! For slow eaters, for keeping food warm during transport, for flexible mealtimes.

Inducook

The optimum regenerating system for freshly chilled foods. Easy to use - induction waves as food warmers and smart dishware: heated foods are warmed, chilled foods remain chilled.

Profiline

With its comprehensive array of food service trolleys, lowerators, dispensers and tray transport trolleys, we provide you with professional tools for economical kitchen work.
